The role of resorts in enhancing citizens’ health in public spaces

Abstract:
In the role of World Health Organization (WHO), health is defined as the state of complete physical, mental, and social well-being. One of the fundamental rights of every human being, regardless of social status, religious, political beliefs, cultural and social status, is health. Health benefits by being accessible to the higher standards of living. It is known that certain aspects of the health such as roads, safety, and some parts of the public health has been neglected in our urban planning. While healthcare facilities and healthcare services are important, the city planning board is also taken into consideration to integrate the public spaces as places for gathering, interaction, and enjoyment in people’s life, especially during their leisure time. In this article, we are going to discuss the need to enhance the location of resorts to be connected to detailed design and urban planning, which their role is to pay attention to the health of the citizens.

Keywords: resorts, enhancing, citizens’, health, public space

Introduction:
The first and most important thing that a person enters in it is the room. After room, the public area is built into the new world that is not necessarily to understand it. So it is observed that location is one of the most important attractive places which a person can discover larger principles except from his family or family; the principle of residential environment of citizens is its city. Jordan is located in the city rather than in the house. In past periods, city located on a few points with some others, forums and religious sites and some cultural events that influence culture and follow their regulations. In general the important and useful property of city was usually centers and redundancies to meet the needs of larger areas and its environment.

Problem Statement:
Focus and finding of the locality identity

Research Questions:
Research questions for determining a visual identity and sense of belonging to the locality, finding a new framework and visualization techniques for urban planning. The study by using a combination of urban planning and different planning techniques and the use of computer software and design concepts and the use of different techniques and design concepts and the use of the software of graphic design and visual identity integrates into the design process.
