CONTEMPORARY ART GALLERY

The concept of the gallery

Place of building

Flux

Green loads

Connection of building with arcade

Natural lighting

This contemporary art gallery is situated in the heart of Tirana, near the main cultural and historical sites. It is designed to complement the existing urban fabric and enhance the cultural landscape.

The building is composed of three rectangular volumes, which are covered with a metal facade that reflects the surrounding cityscape.

The interior spaces are organized around a central atrium, which is the heart of the building and serves as a focal point for exhibitions and events.

The façade is designed to be highly visible and recognizable, with large glass windows that allow natural light to enter and create a dynamic interior space.
